EXPERIENCE

Freelancing - web development

2022 -

Creating modern, intuitive solutions. Leveraging technologies such as Vue and react for my front-end work. Working with Python and Golang to create rest APIs. This has given me valuable hands-on experience in handling APIs.

EDUCATION

Moringa School, Nairobi — Front-end software development

2019 - 2020

Learnt front-end development using Bootstrap and Angularjs. I also gained git and agile development knowledge and was able to create and collaborate on beautiful client-side websites.

Moringa School, Nairobi — Full stack software development

2021 - 2022

Specialized in full-stack software development using Javascript and Python languages. I was able to learn containerization using Docker and deploying websites using Heroku.

SKILLS

Django/Flask/Python
Docker
